

ORDIPAT

Introducing Ordipat Company

*Specialized in Intellectual Property
Software Suites for 30 years !*

ORACLE®
Certified Solution Partner

The Company

The best asset to achieve management software: a permanent contact between promoters, users and computer science professionals

Who Are We ?

ORDIPAT Company was established in 1978 by several Intellectual Property Offices. Their aim: sharing their know-how in the field of Industrial Property software achievement and use in common the necessary technical ways for these completions. Remember: in 1978 a mini-computer 10 times less performing than the first PC from the 80's costed more than 150,000 €...

Our legal form is SAS *Simplified Joint-Stock Company* (specific French form of a Limited Company), with the capital of 137.856 €, our shareholders being:

- Cabinet Lavoix
- Cabinet Beau de Loménie
- Cabinet Plasseraud
- Bureau D.A. Casalonga – Josse
- Cabinet Regimbeau
- Cabinet EGYP
- Cabinet Malémont
- Cabinet Santarelli

However **ORDIPAT is a trading company** which markets its softwares to numerous other Industrial Property Offices, in **complete independence**. Confidentiality and professional secrecy are our key words. We know how to put up and assure specific and customized services for each one of our clients.

*Industrial Property Offices can be compared to dynamic SMEs. Which Small and Medium Enterprise may venture to entrust its data processing to a one-man band or a non-specialized computer science company where the staff turnover is consequent? **Our endeavour falls within the long lasting duration.** Time is necessary to train a skilled IP advisor. In the same way, time is necessary to train a skilled IP computer scientist.*

The management of our Firm is meticulous and steadily done. We watch over the good working of the computer suites of IP Offices highly equipped. Our solutions are meant to be both technically and financially stable and durable. **More than 1,000 users are working with our systems.**

Our Human Resources

The staff of our firm, constituted of 29 persons, is divided into five teams.

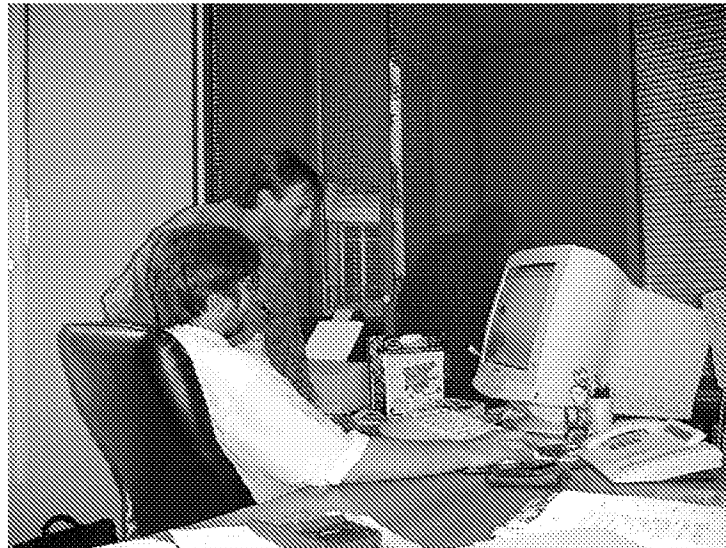

1. A **Development** team composed of one Project Manager, Mr. LUX, and of 9 engineers, all of them having between 5 and 15 years of experience in the Industrial Property computer science field. This team is obviously in charge of the software achievements as well as their maintenance.
2. A **Tests & Laws** team composed of 3 persons. Mrs AZEVEDO, responsible of the team has more than 30 years of experience and her 2 assistants, more than 20 years. All of them have worked for Industrial Patent Offices during their careers. They are in charge of testing the softwares, training the users, elaborating technical supports and **updating the laws** for our softwares. Information is collected through numerous and various chanelts.
3. An **Exploitation** team composed of 12 people. The person in charge, Mr. BALCAREK, has an experience of 30 years. For clients who wish to entitle us with their computer system management, this team is in charge of the machines administration and maintenance. The members of this team are able to work on numerous and different kinds of systems.
4. A **Domain names** team composed of one jurist graduated by French IP diplomas (CEIPI), and 2 assistants, in charge of the reservation and maintenance of domain names portfolios. This activity is in expanding growth.
5. An **after sales and consulting service** composed of 2 persons, Mr. VITRY, 5 years of experience and Mr. CAVAGGION, in charge of supporting our customers on site.

The management is undertaken by Mr. Olivier BARLOY, having more than 30 years of practice in computer science and 23 years in the Industrial Property field.

Experience, strictness, devotion, are the main qualities of our staff.

We guarantee on duty quality and technical phone from 8 am to 7 pm to all our clients.

Our aim: to be able to intervene on any assistance requirements or unexpected incidents and solve it in less than 15 minutes. In reality, our calculus exploitation center provides attendance quite beyond this schedule...

Back in the past

In fact, the activity of the Company started well before 1978. At the beginning of the 70's the incorporator, together with some ORDIPAT pioneers, were already busy in developing softwares for the management of annuities on their behalf. These applications run on huge IBM computers whose calculation time was minutely rented by a specialized company.

When setting up the firm in 1978, all programs were migrated on Digital Equipment Corporation (DEC) mini-computers: PDP 11. As everybody knows, at that time DEC was the first mini-computers manufacturer worldwide, bringing thus computer science within SMEs' reach.

Towards the end of the 80's, ORDIPAT migrated its softwares on VAX, the new DEC range of mini-computers.

At last, in 1996, these programs were migrated on ALPHA, the new ultra powerful DEC machines. For comparison, ALPHA computers are 100 to 500 times powerful than the first PDP and are about 10 times cheaper.

Since 1997, our softwares have been designed to be able to run on any machines mini or micro PC or MAC computers.

Since 1997 too, we have highly increased our **Internet** activity. We file numerous domain names and host web sites in connection with these domain names. We are AFNIC members.

Our softwares

Our softwares are mainly intended to the management of Industrial Property Offices.

They allow the management of any kind of Industrial Property cases and are broken up into the following items:

- Parties management
- Patents management
- Trademarks management
- Designs management
- Domain names management
- Miscellaneous cases management (consultation, litigation, search...)
- Cases Procedure management
- Terms and deadlines management
- Mails management
- Registrations
- Financial management (tariffs, disbursements, currencies, invoices, cost estimations, budgets)
- Annuities / Renewals management
- Laws management
- E-documents management and storage

The cases procedure management can be set in a very detailed way if the manager wishes so. The Valorization is linked to the Procedure settings; billing ensues naturally from it.

Legislations updates are maintained by ORDIPAT.

Our services provisions

FACILITIES MANAGEMENT

For most of our clients we provide real Facilities Management services. **We can fit to your organization requirements** and are able to manage entirely or partially your data system.

- Purchase
- Renting
- Leasing
- Maintenance

Are some of the many examples of financial solutions which can be suggested.

ADVISORY SERVICE AND AUDIT IN DATA SYSTEMS

- Audit
- Study
- Advisory service

Our abilities in the field of huge and complex databases have allowed us to be qualified ORACLE Certified Solution Partner. This certification guarantees that our engineers dispose of all the required skills to deal with the Oracle products and their development tools.

INTERNET

We provide all kinds of services in this field:

- Domain names filing
- Domain names portfolio management
- Domain names recovery
- Litigations
- Searches
- Monitoring
- Web Hosting
- Internet Service Provider
- Web site designer
- Secured payment
- Database network
- Putting on-line Intellectual Property portfolios with our IPR Control portal.

Our Internet activities are in expanding growth. The privileged relationship between our customers, the Industrial Property offices, and our Company, allows us to file a great number of domain names and to host numerous web sites.

Our technical environment

Our technical architecture takes on several aspects:

Applications developed on our behalf are designed to be able to work on any technical environment. However, our main systems are mainly composed of Alpha machines of the Digital brand. We exploit also several hundreds of servers. We handle significant workstation populations inside numerous Intellectual Property Offices.

Our software technology is mainly based on Oracle and Microsoft products.

As concerns Internet, our hosting systems are constituted of several dozens of Linux and NT servers, as well as numerous interconnection networks to fit our needs.

The Interactive sites also relies on Oracle products.

Our computer room is highly secured: double air-conditioned, double fire detectors, automatic extinction and electronic surveillance. We have also at our disposal an help center.

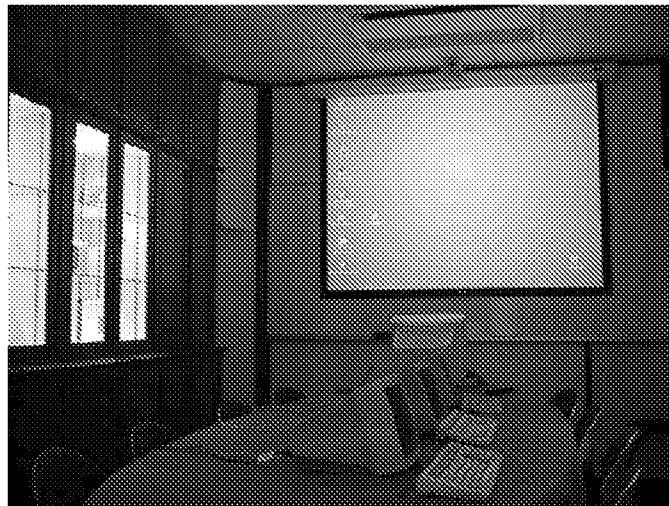

Our offices

Our offices are close to Saint Lazare station where is the National French Patent Office and the majority of our shareholders. We benefit of an exceptional localization in an old freestone building, wonderfully renovated, providing parkings, and however very functional on a technical background.

Our meeting and training rooms offer a warm aspect, while being equipped of the most recent and modern multimedia tools.

The future

Our next applications will be resolutely directed towards three levels architectures, thin clients, Internet, Multimedia, Document management and Electronic storage.
